

## Company Overview

Flexible, Secure,  
Reliable!

RapidScale simplifies cloud computing with innovative solutions that solve business problems and remove the barriers to flexible, cost-effective IT. With private and hybrid options that are compatible with any application, physical server or appliance, we make cloud computing viable for our customers, and we support our offerings with world-class service to maximize return on investment.

RapidScale takes a multi-faceted approach to deliver redundancy, high availability, backup and recovery using best-of-breed technologies from the market leaders. You benefit from access to enterprise-class solutions without the high price tag of capital expenditures, and gain access to an IT infrastructure that grows with your business.

RapidScale is passionate about delivering first-rate customer service, allowing you to focus on your core business without worrying about infrastructure. RapidScale serves customers across a diverse set of verticals.

“ As a customer of RapidScale, our company sold a division to a competitor. Because of our partnership, we were able to separate IT operations within 48 hours of notifying the RapidScale team. In my past experience, splitting a complex IT operation such as ours would have taken months, not days. That’s the power of the RapidScale cloud! ”

—Matt Irey, VP IT, Agilex Flavors & Fragrances
